Third Party Extensions

There are several **Third party extensions** which have styled support, to reflect the *elegant appearance*

of the theme, these are primarily

JomSocial

,

K2

,

JComments

and

RokQuickCart

.

RocketTheme Extensions

This is a listing of all the RocketTheme extensions that accompany the template release.

[RokStories Module](#)

Functional showcase module for displaying content items and their accompanying images in an interactive and versatile manner. [Demo](#) - [Download](#) - [Documentation](#)

[RokAjaxSearch Module](#)

Ajax powered module, allowing for interactive search of both local Joomla pages and the web with its Google integration. [Demo](#) - [Download](#) - [Documentation](#)

[RokNavMenu Module](#)

Integrated Extensions

Written by Administrator
Monday, 24 May 2010 12:23

RokNavMenu is a foundational extension which is at the core of the inbuilt menu systems and is a requirement for all themes. [Demo](#) - [Download](#) - [Documentation](#)

[RokBox Plugin](#)

Javascript popup / litebox utility, can be used for images, links, videos, websites, PDFs and much more. [Demo](#) - [Download](#) - [Documentation](#)

[RokCandy Component](#)

A component that provides BBcode style functionality for Joomla for swift and easy implementation of complex code elements. [Download](#) - [Documentation](#)

[RokGZipper Plugin](#)

A performance plugin that compresses your CSS/JS files, resulting in faster page loads. Compatible themes only. [Demo](#) - [Download](#) - [Documentation](#)

[RokTabs Module](#)

Tabbed content module, perfect for maximising content exposure without sacrificing on site real estate. Built-in Mootools effects. [Demo](#) - [Download](#) - [Documentation](#)

[RokPad Editor](#)

A code editor with syntax highlighting, ajax saving and much more. Better than Joomla's *No Editor*

[Download](#)
